Survey of December 2012 and May 2013 Graduates of John Brown University

The following is a summary of the results from a survey of December 2012, and May 2013 graduates of John Brown University. Final surveys were mailed out in November of 2013. Results are based on a 84% return rate (78% last year). Submitted by Chris Confer Director of Career Development, January 2014.

**Placement Rate**
98 percent of the students who replied to the survey are currently employed or accepted into graduate school. (99% last year)
This survey is based on information from 175 students.
20 percent (35) of graduates were accepted into graduate school (18% last year).
**Note:** Because of the nature of this survey it does not include Degree Completion graduates, due to the fact that they must already have employment before beginning their degree program.

**Average number of offers**
The average number of job offers for those students who are now employed was 1.4 (1.8 last year).

**Relation of job to major area of study**
55% of our employed graduates report that their job is "Highly Related" to their major. (53% last year)
25% of our employed graduates report that their job is "Moderately Related" to their major. (26% last year)
19% of our employed graduates report that their job is "Not Related at all" to their major. (21% last year)
