ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The faculty of Engineering is committed to the following objectives. These objectives are consistent with both the university and divisional mission statements and emphasize the head (intellectual), heart (spiritual), and hand (professional).

**HEAD**—John Brown University engineering graduates will be utilizing a strong general education, a broad foundation in core engineering fundamentals, and a depth of knowledge in their specific engineering concentration as they progress in their chosen careers. Additionally, graduates will be demonstrating a desire to remain current in their career field by engaging in life-long learning.

**HEART**—John Brown University engineering graduates will be participating in activities to serve both God and humanity by using their personal and professional skills and experiences.

**HAND**—John Brown University engineering graduates will be making meaningful contributions as an engineering professional, a graduate student, or a Christian technical missionary.
