# John Brown University TUG Retention Report Fall 2023

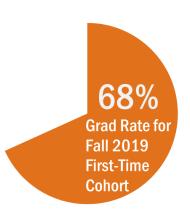

#### Introduction

Retention is a key issue facing John Brown University. In our previous Strategic Plan we set a goal of a 70% graduation rate in the traditional undergraduate program. The first step to accomplishing this would be to have at least 82% of the freshman cohort retain to the second year. Since 2011, all cohorts except the 2014, 2018, and 2021 cohorts hit the 82% retention mark. Our latest 6-year graduation rate cohort, the 2017 cohort had a 71% graduation rate. The purpose of this document is to show our retention and graduation rates for students with various characteristics. It is hoped that this data can help inform our intervention strategies with students to help improve their connection to JBU and, hence, their learning and persistence. For each characteristic, there is a graph of the retention rate and a graph of the graduation rate. The primary purpose of the graphs is to visualize trends over time. Following each set of retention and graduation rate graphs is a data table with initial enrollment, number of students retained, percent of students retained, number of students graduated, and percent graduated.

#### Retention and Graduation Rates: Overall and by Gender

Note that the most recent 6-year graduation rate is from the 2017 cohort. The graphs show the 4-year and 5-year rates for the 2019 and 2018 cohorts, respectively. While transfer students are not included in the official retention and graduation rates, the number of transfer students makes a significant impact on enrollment.

Retention to 2nd Year: Freshman Cohort

Graduation Rate: Freshman Cohort 6-Year Rates for 2013-17 Cohorts; 5-year rate for 2018; 4-year rate for 2019

# Retention and Graduation Rates by ACT & SAT Scores: Freshman Only

We would expect greater retention for students with higher ACT and SAT scores, and the data bear that out. The data suggest that initiatives directed at students with low to mid scores (ACT 20-23 and SAT 900-1100) could help with retention. And the lowest scorers are much less likely to graduate even if they do continue for the second year.

#### **Retention and Graduation Rates by Application Date**

Students matriculating as first time freshman persist at a higher rate if they get into the application process early. This has become increasingly true also for transfer students. Graduation rates have not been consistent across categories and years

#### Retention to 2nd Year: Freshman Cohort by Application Date

#### Graduation Rate: Freshman Cohort by Application Date

#### **Retention and Graduation Rates by Scholarship Amounts**

One area that is often cited as a major factor in retention is finances. The data confirm that students are generally more likely to retain and graduate if they have higher scholarship amounts

#### Retention to 2nd Year: Freshman Cohort by Scholarship Amount

#### **Graduation Rate: Freshman Cohort by Scholarship Amount**

#### Retention Rates by First-Year On-/Off-Campus Residence

The cohort size for off-campus freshmen is small—averaging less than 10% of the total cohort. It is clear, however that our freshmen commuters are missing out on something that helps connect them to the institution.

## Retention to 2nd Year: Freshman Cohort by Residence

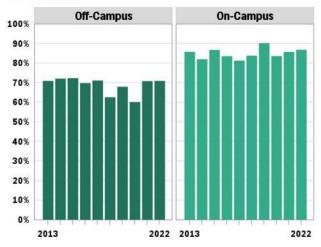

TABLE 17: PERSISTENCE AND COMPLETION BY ON-/OFF-CAMPUS FOR FRESHMEN

#### **Retention and Graduation Rates by Athletes**

On the whole, our athletes persist at rates similar to those of the student body. There is great year-to-year variation within individual sports. The cohort sizes of most sports and for transfers by sport are too small to be treated separately.

#### Retention to 2nd Year: Athletes by Sport

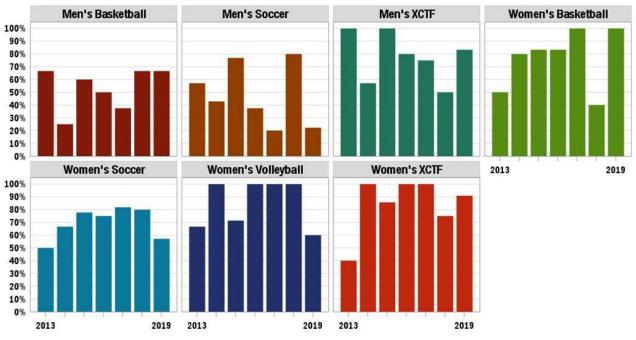

#### Retention to 2nd Year: Athletes by Freshman or Transfer

#### **Graduation Rate: Athletes by Sport**

6-Year Rates for 2013-17 Cohorts; 5-year rate for 2018; 4-year rate for 2019

#### **Graduation Rate: Athletes by Freshman or Transfer**

#### Retention and Graduation Rates by Pell Status: Freshman Only

Generally, Pell recipients have retained and graduated at a slightly lower rate than the non-Pell students with a greater difference in the graduation rate than in the retention rate.

Retention to 2nd Year: Freshman by Pell Status

Graduation Rate: Freshman by Pell Status 6-Year Rates for 2013-17 Cohorts; 5-year rate for 2018; 4-year rate for 2019
